

**PRESSURIZED AIR****AIR DUSTER****FEATURES**

- Moisture Free
- Precision Dusting
- For use on office equipment, computer hardware, scientific equipment, clean rooms, and much more
- 100% Ozone safe
- 0% VOC

**PROPERTIES**

**Appearance:** Compressed liquefied gas. Colorless with Ethereal odor.

**Boiling point:** -13 °F

**Specific gravity:** 0.909 gr/cc

**Total VOC:** 0 %

**Solubility in water:** Soluble

**Flash point:** -58 °F (TOC)

**Storage stability:** Keep away from open flames and high temperatures

**Flammability:** Flammable aerosol

**Packaging:** 12x10oz Net Wt. Cans/Case

- Properties are typical and subject to usual manufacturing tolerances.

AIR DUSTER contains moisture-free gas under high pressure and is ideal for removing microscopic dirt, dust lint, iron oxide deposits, and paper that normal hand dusting cannot reach. AIR DUSTER does not leave residues and is non-abrasive, making it ideal for various surfaces including plastics. It can be used on office equipment, electronics, electromagnetic devices, computer hardware, clean rooms, scientific equipment and even automobiles. AIR DUSTER features a finger friendly trigger which eliminates finger chill and fatigue and an attachment tube to reach even the smallest of crevices.

To use, turn off all electronic devices and hold can approximately 2 inches from the target surface. Operate in a series of short blasts, making sure not to shake during use as some of the flammable liquid may be dispersed. Refer to the label and attached SDS for additional instructions and precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
