

TIRE TREATMENT

ARMOUR GUARD

FEATURES

- Micro-emulsion protectant and conditioner
- Provides long lasting, water resistant coat
- High gloss shine enhances appearance
- New and Improved Formula

PROPERTIES

Appearance: Clear, oily liquid with cherry odor.

Boiling point: 165 °F

Specific gravity: 0.85-0.95 gr/cc

Non volatiles: 30 %

Flash point: (closed cup) 27 °C

Solubility in water: Insoluble

Storage stability: Keep away from high temperatures, open flames, and oxidizers

Flammability: Flammable

Packaging: 4x1 gallon Case
5 gallon Pail

ARMOUR GUARD is a silicone oil protectant and conditioner specially formulated to penetrate and protect tires. ARMOUR GUARD provides a long lasting, water resistant coating that protects tires and adds an attractive, high gloss shine. Prior to application, surface should be cleaned and rinsed. Surface does not have to be completely dry to apply product. Lightly mist on surface, making sure to cover the entire area where a protective shine is needed. Any drips or run off will eventually disappear, leaving a brilliant shine. For best results, wipe after applying. Refer to the label and attached SDS for additional instructions and precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
