

PROTECTIVE COATING

BATTERY TERMINAL PROTECTOR

FEATURES

- Non-Chlorinated Protective Coating
- Provides air tight, waterproof seal
- Coating will not crack or peel even under severe flexing
- Curtails power leakage
- Non-Tacky
- Extends battery life

PROPERTIES

Appearance: Brown liquid with slight solvent odor.

Boiling point: >244 °F

Specific gravity: 0.80-0.90 gr/cc

Non volatiles: 10 %

Solubility in water: Negligible

Flash point: 67 °F

Storage stability: Keep away from high temperatures, open flames, and oxidizers

Flammability: Level 3 Aerosol

Packaging: (20oz. cans)
12x14oz. Net Wt. Cans/Case

BATTERY TERMINAL PROTECTOR is a special, non-tacky, flexible coating that provides long term corrosion protection for battery terminal posts, housings, cable ends and supports. It forms an air tight, waterproof seal that controls leaks and extends the battery life. The coating will not crack or peel even under severe flexing. It also provides superior resistance against acids and alkalis and protects batteries during use as well as in storage.

BATTERY TERMINAL PROTECTOR is intended for use on autos, boats, trucks, fork lifts, golf carts and storage batteries. Refer to the label and SDS for instructions and precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
