

OILS AND LUBRICANTS

CHAIN AND CABLE LUBE SPRAY

FEATURES

- Special lubricating foam
- Deep penetrating action
- Contains no chlorinated solvents
- Clings longer in vertical applications
- Withstands high environmental temperatures and pressures
- Tested to withstand salt spray for 72 hours
- Excellent water and weather resistance
- Excellent rust protection and lubrication

PROPERTIES

Appearance: Black thick liquid with characteristic solvent odor

Specific gravity: 0.79 gr/cc

Boiling point: 532.4 °F

Flash point: -156 °F

Chemical type: Lithium grease and mineral oils

Total VOC: 80 %

Solubility in water: Negligible

Flammability: Flammable Aerosol

Packaging: Case of 12 x 15oz cans

CHAIN AND CABLE LUBE sprays as an instant foaming, deep penetrating liquid that flows inside intricate chains and cables where the greatest stress occurs. It provides a thick foam that clings to vertical surfaces, allowing longer time for penetration into wire rope and other roller chain mechanisms. CHAIN AND CABLE LUBE is formulated with lithium and molybdenum greases that combine to provide surfaces with superior lubricating properties. It is ideal for outdoor use since it retains its lubricity under conditions of high acidity or salinity and will not break down, fly off or wash away with water or steam. Apply spraying on surface at a 8 to 10 inches distance. It is important to shake vigorously for at least 1 minute before applying. Repeat application periodically. Do not apply near open flame or sparks. Refer to the attached SDS for flammability and additional precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
