

SPECIALTY CLEANER

CHEMTREAT

FEATURES

- Powerful Alkaline Formula
- Bactericide & Fungicide
- Controls the growth of bacteria and fungi in water
- Ideal for use in evaporative condensers, water cooling towers and more

PROPERTIES

Appearance: Green / Yellow solution with strong sulfur odor.

Boiling point: 212 °F

Specific gravity: 1.18 gr/cc

Non volatiles: 25-30 %

Solubility in water: Soluble

Flash point: None

Storage stability: Keep away from high temperatures and acids

pH of liquid: 10.5-12.4

Flammability: Non-flammable

Packaging: 55 gallon Drum

CHEMTREAT is a highly effective bactericide and fungicide for use in controlling the growth of bacteria and fungi found in industrial recirculating water cooling towers, evaporative condensers, mills, secondary and tertiary oil recovery, and drilling fluids. Dosage for industrial recirculating water cooling towers or evaporative condensers will depend on the condition of the system prior to treatment initiation. Systems which are heavily contaminated should be cleaned first. CHEMTREAT can then be applied to the cleaned system or when growth is first noticed. Apply 13 - 14 ounces of product per each 1000 gallons of water in the system. This dose may be repeated once, twice or three times weekly or as required to control the growth of slime-forming organisms. Refer to the label and SDS for additional instructions and precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
