Chemtron **Fragrance Concentrates** are special combinations of fragrance oils and selected emulsifying agents, formulated to provide the best aroma sensations, in any water based solution. Just add to water in the desired concentration, mix and you obtain a strong scented product ready to use. Use in marine, automotive, janitorial, shops and many other applications. It is compatible with most other ingredient in water based formulations, so that its use is very flexible and diverse. If is going to be used undiluted, make sure that product does not affect materials, testing a small reserved area before applying. Handle product with due care avoiding prolonged direct inhalation or contact with eyes. Refer to the attached SDS for additional precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
