Odor: Characteristic to fruits and mint

Viscosity: NA

Dimensions: 2.0 x 2.0 x 1/2 inch bar

Specific gravity: Solid, < 1 gr/cc

Melting Point: 130 °F

Non Volatiles: 25%

Solubility in Water: Insoluble

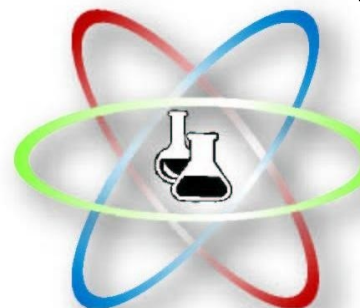

Chemical Type: Fragrance

Packaging: Case with 100 bars

- Properties are typical and subject to usual manufacturing tolerances.

FRESH BAR FRUITY MINT is a conveniently formulated wax bar, impregnated with specific fragrances, that delivers a continuous scent for up to one month to the surrounding area. FRESH BAR FRUITY MINT releases fragrance by vapor pressure in a slow release manner, to maintain a constant aroma in the surroundings. Its fabric envelop allows the product to be handled safely and protects the surface where it is placed. It is not recommended to place on top of hot surfaces as it may melt. Use in air conditioning ducts, air casings, cars, trucks, boats, closets, garbage containers, restrooms, vacuum bag compartments and where a constant fresh scent is desired. Keep away from reach of children. Refer to the attached SDS for additional precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
