

LUBRICANT

MD-2

F E A T U R E S

- Penetrant and Lubricant
- Moisture Displacer: Protects Electrical Parts
- Non-Flammable liquid with Fast Penetrating action cuts through dirt, rust and scale
- Protects Mechanical by reducing friction
- Loosens frozen nuts and bolts by removing corrosion

P R O P E R T I E S

Appearance: Clear, brownish liquid with low solvent odor.

Boiling point: Not Available

Specific gravity: 1.44 gr/cc

Non volatiles: 90 %

Solubility in water: Insoluble

Flash point: None

Storage stability: Keep away from high temperatures and strong oxidizers

Flammability: Non-flammable liquid

Packaging: 5 gallon Pail

MD-2 is a nonflammable lubricant formulated with special water displacement compounds, corrosion inhibitors, solvents, non-greasy lubricants, and P.T.F.E. This lubricant is used to displace water and moisture from electrical equipment such as machinery parts, contact points and automotive distributors. It quickly cuts through rust to creep into parts which have become encrusted by corrosion or oxidation. It reduces friction and prevents surface deterioration by creating a unique molecular film that seals out water. MD-2 contains no ozone depleting compounds and meets Military Specification Mil-C-23411 for corrosion prevention. Refer to the label and attached MSDS for instructions and precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
