SPECIALTY CLEANER

OXY-TREAT 28

FEATURES

- Removes stains and malodors
- Fast acting and chlorine free
- Converts sulfides into sulfates
- Safe to handle
- Removes Scale
- Contains buffering salts
- Biodegradable

PROPERTIES

Appearance: Clear liquid solution with no specific odor.

Boiling point: 210 °F

Specific gravity: 1.05-1.10 gr/cc

Non volatiles: Not Determined

Solubility in water: Soluble

Chemical type: Peroxide Oxidizer

Storage stability: Keep away from high temperatures

pH of liquid: 4-5

Flammability: Non-flammable

Packaging: 4x1 gallon Case
5 gallon Pail
55 gallon Drum

OXY-TREAT 28 is an oxygen provider that can be used to clean and remove organic scale deposits. OXY-TREAT 28 is safe and effective when working at high temperatures, where the release of oxygen is greater. It converts sulfides and sulfur deposits into soluble materials, reducing bad odors. To remove scale from concrete or from metal surfaces, use undiluted by spraying on surface or by immersion and leaving until desired effect is achieved. Do not use near open flames or in a closed container as this product liberates oxygen. After use, rinse with water and neutralize metal surfaces with a degreaser or alkaline solution.

Refer to the label and attached SDS for additional instructions and precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
