## SPECIALTY LUBRICANT PENETRATING LUBE

### FEATURES

- Penetrates through rust and scale to free frozen parts
- Lubricates parts to reduce friction
- Removes moisture from electrical equipment
- 39,000 Volt Dielectric Strength
- Never Dries Out
- Non-Flammable

### PROPERTIES

**Appearance:** Light brown liquid with solvent odor.

**Boiling point:** Not Determined

**Specific gravity:** 1.44 gr/cc

**Solubility in water:** Insoluble

**Flash point:** None

**Storage stability:** Keep away from high temperatures and open flames

**pH of liquid:** Not Available

**Flammability:** Non-flammable aerosol

**Packaging:** 12x12oz Net Wt. Cans/Case

PENETRATING LUBE is a non chlorinated, non-flammable formula that penetrates through rust and scale to loosen parts which have been frozen by corrosion while lubricating them to ensure free and easy movement. PENETRATING LUBE has a dielectric strength of 39,000 Volts. It acts as a demister, creating a waterproof film that dries out electrical equipment, inhibiting corrosion and preventing electrical discharges. This non-drying film also protects parts against atmospheric conditions and mild chemical corrosion. It meets the military specification MIL-C-23411 for corrosion prevention.

Refer to the label and attached SDS for instructions and precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
