

SPECIALTY PRODUCT

PETROSORB**FEATURES**

- Absorbs all types of petroleum & solvent spills
- Solidifies oils, grease and petroleum on top of water, facilitating clean up
- Economical, non-toxic, nonabrasive
- Water repellent
- 100% Natural / Organic
- Non leaching
- Easy clean-up
- Super absorbent
- Can be incinerated

PROPERTIES

Appearance: Brown solid powder with irregular fibers.

Boiling point: Not Applicable

Specific gravity: 0.80 gr/cc

Non volatiles: 99 %

Solubility in water: Insoluble

Density: (water = 1) 1.5

Storage stability: Keep away from reactive metals and strong acids

pH of liquid: Not Applicable

Flammability: Non-flammable

Packaging: 10 Lb. Bag

- Properties are typical and subject to usual manufacturing tolerances.

PETROSORB is a coarse powder that quickly and easily absorbs oils and heavy hydrocarbons spills whenever they occur. It will turn any petroleum spill into a fluffy, dry substance on contact. PETROSORB has a powerful encapsulation capability that will eliminate messy and costly clean up and will also eliminate the fears of a spill spreading or leaching. It will remain in the water surface since it does not dissolve in water, so it can be collected with vacuum, broom, or pail and easily disposed. When using near flammable materials, keep away from all sources of ignition and flames, ventilate the area well. Control the source of spill while at the same time spreading PETROSORB, starting around the edges of the spill. Spread sufficient quantity of PETROSORB to cover entire area of spill and allow several minutes to absorb then collect material. Dispose of collected and absorbed material following regulations regarding disposal of oil and solvent waste when applicable. Refer to the label and SDS for additional instructions and precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
