

**SPECIALTY CLEANER****RADIATOR****FEATURES**

- Powerful and concentrated cleaner
- Removes scale, build up, and all types of organic deposits from radiators and metal parts
- Highly acidic solution, not recommended for aluminum

PROPERTIES

Appearance: Green liquid with acid odor.

Boiling point: 212 °F

Specific gravity: 1.01 gr/cc

Non volatiles: Not Determined

Solubility in water: Soluble

Storage stability: Keep away from direct heat and oxidizers

pH of liquid: Acidic

Flammability: Non-flammable

Packaging: 4 x 1 gallon Case
5 gallon Pails

- Properties are typical and subject to usual manufacturing tolerances.

RADIATOR DESCALER is a concentrated acid based cleaner that removes scale, dirt deposits, dust, oxides, mildew, fungi, hair, oils and many other organic deposits from radiators and other metal parts. RADIATOR DESCALER contains a combination of Hydrochloric and other inorganic acids, a surfactant compound that acts as a anti re-deposition agent and a corrosion inhibitor chemical that prevents rusting and oxidation. For very high build up use product undiluted. Product can also be diluted depending on the job.

RADIATOR DESCALER is a strong acid. Handle with due care. Use safety goggles and acid resistant gloves. Refer to the label and attached SDS for additional instructions and precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
