LAUNDRY FABRIC CARE

WATER-SOFT

FEATURES

- Concentrated formula
- Contains sequestering agents that kelate iron, calcium, magnesium, and unwanted minerals
- Contains water conditioners
- Prevents linen graying
- Allows less use of detergent
- Non foaming, Non flammable

PROPERTIES

Appearance: Hazy white liquid

Boiling point: 212 °F

Specific gravity: 1.20-1.30 gr/cc

Non volatiles: 20-30 %

Solubility in water: Soluble

Chemical type: EDTA and complex salts

Storage stability: More than 1 year.
Stable under normal storage conditions.
Compatible with most laundry chemicals.

pH of liquid: 9-11

Flammability: Non-flammable

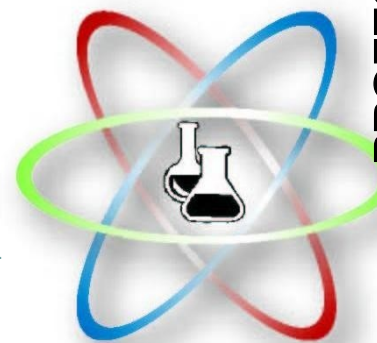

Packaging: 4x1 gallon Case
5 gallon Pail

- Properties are typical and subject to usual manufacturing tolerances.

WATER-SOFT is a concentrated liquid sequestering and kelating agent specially formulated to prevent graying and yellowing of fabrics in areas with poor water conditions. WATER-SOFT can be used in hot or cold water and is ideal for use in institutional, commercial, and industrial laundries. A dilution of 1-2 oz per 50 lbs of dry fabric can be used if bleach is not used, otherwise use 2-3 oz of product for best results.

To use, simply load WATER-SOFT in the washing cycle with the corresponding amount of detergent, and also in the bleaching cycle. Refer to the label and attached SDS for additional instructions and precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
