ENGINE FUEL CONDITIONER

X-10 FUEL CONDITIONER

FEATURES

- Special blend of acid neutralizers, moisture absorption additives and anti wear, corrosion inhibitor
- Removes sludge and varnish
- Cleans injectors and carburetors
- Improves performance
- Reduces downtime and maintenance cost

PROPERTIES

Appearance: Clear red liquid with characteristic odor

Boiling point: 190 °F

Specific gravity: 0.89 gr/cc

Vapor pressure: 200 mmHg

Solubility in water: Negligible

Flash point: 88 °F (Closed Cup)

Storage stability: Keep away from open flames, high temperatures and oxidizers.

pH of liquid: 9-10

Flammability: Flammable liquid

Packaging: 1x5 gallon Pail

X-10 FUEL CONDITIONER is a modern, concentrated fuel conditioner that is specifically engineered to answer the needs of today's high performance engines. It is chemically blended to neutralize fuel acids, as well as to eliminate the damage caused by sulfur, gum, varnish and moisture, which is found in all fuels. The anti wear, corrosion inhibitors and penetrants in X-10 are stable solutions that offer outstanding performance and are safe to use in all types of fuels and engines, including engines equipped with catalytic converters. For gasoline and diesel engines, add 1 gallon of X-10 to 200 gallons of fuel. Use with caution and provide adequate ventilation, as this product is highly flammable and hazardous to ones health. Refer to the label and attached SDS for additional instructions and precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
