EPA Registered Cleaner - Disinfectant - Deodorizer

# SANI AC No Odor

## FEATURES

- Kills SARS-CoV-2, which causes COVID-19 on hard, non-porous surfaces in 60 seconds
- Ready-To-Use Disinfectant Spray
- Virucidal, Bactericidal, Fungicidal, Mildewstatic
- Cleans, Disinfects, and Deodorizes in ONE EASY STEP
- No abrasives or bleach
- Eliminates Odors
- Kills 99.9% of Germs
- Kills 99.9% of Bacteria
- **Non-abrasive, disinfectant cleaner for commercial HVAC cooling coils and refrigeration equipment and freezer evaporation coils**
- Designed for use with trigger sprayers, low pressure sprayers, refillable spray bottles, mechanical spray devices, or cord-less, backpack or handheld sprayers
- EPA approved for use in Athletic premises and Gyms

## PROPERTIES

**Chemical Composition:** Quaternary Ammonium Salts Blend

**Appearance:** Transparent Blue Liquid

**Odor:** Odorless

**Density:** 1.01 g/ml

**Non volatiles:** 10-11 %

**Solubility in water:** 100% Miscible

**Storage stability:** Keep away from direct heat and strong oxidizers

**Boiling point:** 212 °F

**Flash point:** >210 °F

**pH:** 11-12

**Packaging:** 4 x 1 gallon Case  
12 x 1 quart Case  
55 gallon Drum  
275 gallon Tote

Properties are subject to usual manufacturing tolerances.

SANI AC is an EPA Registered Disinfectant (EPA No. 1839-83) that has been approved to kill SARS-CoV-2 on hard non-porous surfaces in just 60 seconds when used according to its directions. It is also approved for use against emerging viral pathogens and appears on the EPA's N-list of products effective against COVID-19.

It is designed specifically as a general, ready-to-use, non-abrasive product with a combination of detergents, quaternary ammonium salts, and solvent to clean, disinfect, and deodorize all in one step. It can be used on hard, non-porous surfaces in homes, hospitals, nursing homes, patient rooms, operating rooms, ICU areas, shower rooms, locker rooms, public restrooms, schools, food processing plants, food service establishments (restaurants) (commercial kitchens), transportation terminals, office buildings, manufacturing facilities, lodging establishments, retail businesses, veterinary clinics, pet shops, animal life science laboratories and athlete/recreational facilities, and all frequent contact surfaces where housekeeping is of prime importance in controlling the hazard of cross contamination.

SANI AC can also be used on commercial HVAC cooling coils and refrigeration and freezer evaporation coils. Additionally, it is formulated to disinfect hard, non-porous, inanimate environmental surfaces: floors, walls, metal surfaces, stainless steel surfaces, glazed porcelain, glazed ceramic tile, plastic surfaces, chrome, brass, copper, laminated surfaces, baked enamel surfaces, bathrooms, shower stalls, bathtubs, and cabinets.

When using an EPA-registered disinfectant, follow the label directions for safe and effective use. Make sure to follow the contact time, which is the amount of time the surface should be visibly wet. Refer to the label for complete usage instructions and the SDS for important precautions and proper PPE. Failure to follow the strict instructions for use may lead to harm and/or failure to properly clean, sanitize, and disinfect.
