EPA Registered Cleaner - Disinfectant - Deodorizer

Sani-Oxide

PROFESSIONAL CLEANING PRODUCTS

FEATURES

- EPA Registered all in one cleaner, disinfectant, and mold growth inhibitor
- Ready-To-Use
- Virucidal, Bactericidal, Fungicidal, Mildewstatic
- Approved for use on hard and soft surfaces
- Kills 99.999% of bacteria on hard, nonporous surfaces
- Prevents mold & mildew from growing as long as 4 weeks on soft surfaces
- Heavy duty odor eliminator
- Reduces allergens
- Approved for antimicrobial control in HVAC systems and air ducts
- Non-rinse food contact sanitizer
- Approved to be applied by fogging

PROPERTIES

Chemical Composition: Quaternary ammonium salts and Chlorine Dioxide

Appearance: Colorless Liquid

Odor: Mild Fresh

Density: 1.00 g/ml

Non volatiles: < 1%

Solubility in water: 100% Miscible

Storage stability: Stable. Keep away from strong acids.

Boiling point: 212 °F

Flammability: Non-Flammable

pH: 8-9

Packaging: 4 x 1 gallon Case
12 x 1 quart Case
5 gallon Pail
15 gallon Drum
55 gallon Drum

Properties are subject to usual manufacturing tolerances.

Sani-Oxide is an EPA registered Ready-To-Use disinfectant and deodorizer (EPA No. 82972-1), that can be used on a wide range of surfaces, and throughout HVAC units. It appears on the EPA's N-List of products approved to be effective against SARS-CoV-2 (COVID 19). It is specially formulated with a combination of very effective active ingredients as a one-step, non-rinse disinfectant.

Sani-Oxide has a combination of a light detergent, quaternary salts, and chlorine dioxide designed to provide cleaning and disinfection on high touch surfaces. Sani-Oxide can be fogged with regular ULV foggers or electrostatic foggers, or sprayed in smaller areas with trigger sprayers or poly-sprayers in hospitals, healthcare facilities, hotels, banks, restaurants, cafeterias, warehouses, schools, cruise ships, jails and prisons, commercial institutions, and many more establishments.

Sani-Oxide can be used as a sanitizer on hard, non-porous, food contact surfaces, soft goods, and fabrics. Sani-Oxide effectively controls bad odors from bacteria and mold. It also inhibits mold and mildew growth on hard and soft surfaces.

When using an EPA-registered disinfectant, follow the label directions for safe and effective use. Make sure to follow the contact time, which is the amount of time the surface should be visibly wet. Refer to the label for complete usage instructions and the SDS for important precautions and proper PPE. Failure to follow the strict instructions for use may lead to harm and/or failure to properly clean, sanitize, and disinfect.
